### PROFESSIONAL SUMMARY

I'm a Flutter Developer with over 3 years of experience building cross platform mobile apps that are fast, responsive and user-friendly. I love turning ideas into clean, maintainable code and collaborating with teams to bring great products to life. I'm skilled in state management, API integration, and third-party libraries, and I care deeply about performance and user experience. I'm always learning and trying to find better ways to solve real problems and build apps that people actually enjoy using.

### WORK EXPERIENCE

#### Mobile Application Developer (Flutter)

Agmo Studio Sdn Bhd · Full-time

August 2023 – Present | MYEG Tower, Petaling Jaya, Malaysia

- Worked closely with designers, backend developers, and product teams to bring mobile app features to life.
- Wrote clean and organized code, followed best practices, and took part in code reviews to keep quality high.
- Created reusable widgets and used third-party packages to speed up development and add more functionality.
- Made the app run smoother by improving how it handled network requests and managing state efficiently.
- Used debugging tools to quickly find and fix bugs saving time and avoiding user issues.
- Set up secure login systems and made sure any sensitive data was properly encrypted.
- Kept plugins and dependencies updated so everything stayed compatible with the latest Flutter and Dart versions.
- Worked in an Agile environment collaborated during sprints and delivered features on schedule.
- Turned UI/UX designs into fully working screens, paying close attention to layout, responsiveness, and details.
- Connected the app with backend APIs to make sure data flowed smoothly and reliably.
- Took the app from development to live production, publishing it successfully on both the App Store and Google Play.

#### Mobile Application Developer (Flutter)

Raving Code Sdn Bhd

June 2022 – June 2023 | Kuala Lumpur, Malaysia

- Developed Myhoneypot, a budgeting and financial management app using Flutter.
- Integrated Firebase for real-time data syncing and backend services.
- Focused on building a stable and smooth user experience with efficient state handling.

## EDUCATION

Bachelor in Computer Science (Hons) Software Engineering  
(Academic Excellency Dean's Award by City University in 2022)

## SKILLS

- Flutter Framework
- State Management (Provider, BloC, GetX)
- Firebase (Authentication, Firestore, FCM)
- API Integration & Debugging
- Shared Preferences & Local Storage
- Custom Widgets & Responsive UI Design
- Dart Programming
- Third-Party Libraries Integration
- Git & GitHub
- Azure DevOps
- Angular (Beginner)
- Java (Basic)

## ACHIEVEMENTS

- Built custom Flutter widgets that improved reusability and user experience.
- Completed Flutter & Dart - The Complete Guide on Udemy, deepening understanding of mobile architecture, best practices, and real-world app building.

## LIST OF SOME ICONIC PROJECTS

- IncluCity App

This app is designed to map the accessible and safe venues & spaces especially for the PWDs (Persons With Disabilities).

[View on Google Play](#)

- DahReply App

This app is an AI chatbot assistant designed to help and support users by answering questions, providing information, and connecting them with a live agent when needed.

[View Here](#)

- Regions Clinic App

This app is designed for Regions Clinic customers to collect and redeem loyalty points.

[View on App Store](#)

## OTHER PROJECTS

- Solarvest Powerbee App
- BNM App (Bank Negara Malaysia)
- DTempatMatrix App
- FraserAndNeave (F&N) App
- MyELK-Desa App
- TLV App
- Vealth.me App
- MyELK-Desa App
